

# SUPREME DIESELS SERVICES

SINCE 1985

# WHO WE ARE

SUPREME DIESELS SERVICES - A reliable company in the automobile industry for Sales & Services of Diesel Fuel Injection Systems and Turbo Chargers, serving the industry for more than 37 years. We are having a modern fully equipped computerized workshop for calibration & overhauling of all types of Diesel Fuel Injection pumps and injectors with the help of our specialised trained technicians.

## ABOUT US

**1985**

Incorporated Supreme Diesels services as a neutral workshop by our MD. Mr. Manmohan Singh with fuel injection system solution for Rotary & Inline Pumps and Injectors.

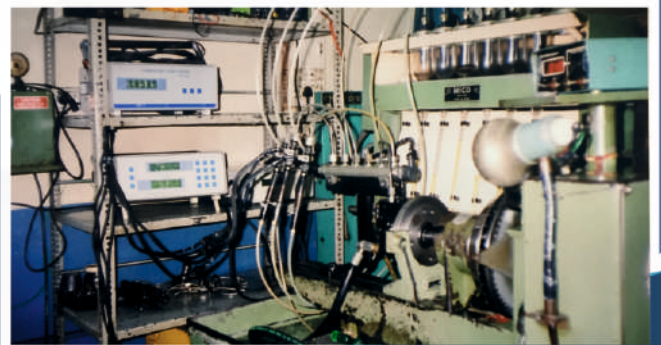

**1991**

Supreme Diesels services became first authorised Mico/ Bosch workshop in Delhi. Also awarded as the most modern workshop in India by Mico/ Bosch.

**2007**

Started with the Testing & Repairing of Common Rail Fuel System (CRDI) being one of the very few of the times.

**2009**

Became the authorised sales and services dealer for Stanadyne India Private Limited.

**2010** ▲

Appointed as authorised Hyundai partner for Fuel Injection repair service for all over india.

**2012** ▲

Started with the Testing and Repairing of EUI/EUP Fuel Injection System (cam type).

**2014** ▲

Started HEUI Injectors & Pumps Testing & Repair with Precise Technology & Spares.

**2017** ▲

Appointed as authorised sales and services dealer for DELPHI -TVS Technologies fueling system.

**2023** ▲

Became authorised sales and service dealer CUMMINS TECHNOLOGIES INDIA PRIVATE LIMITED for commercial vehicle (CCC) as well as HOLSET Turbocharges.

# OUR SERVICES

At SUPREME DIESELS SERVICES, our customers experience stress-free outsourcing of fuel injection and turbochargers service needs. We provide the convenience of parts and Services under one roof; and a wide choice of OE aftermarket and reconditioned parts. Our factory-trained and experienced technicians give expert advice and are focused on the success of our customers. Customers buy from us with greater confidence when they avail our parts & Labor.

## DIESEL FUEL INJECTION TESTING & REPAIR

Our workshop are equipped with state-of-the-art test equipment that give us the most efficient and precise way to examine components, so that we are able to provide the best repair solution for a diesel engine.

Our goal is to extend the life of the diesel engine and avoid costly downtime for our customer.

- Common Rail Injector Testing and Repair
- Mechanical Injector Testing and Repair
- HEUI and EUI Testing and Repair
- Mechanical Pumps and EDC Testing and Repair

## TROUBLESHOOTING & ENGINE DIAGNOSTICS

Our specialist diagnostics equipment gives us dealer level access to most vehicle computer systems. There are literally hundreds of potential error codes that can only be read by specialist vehicle diagnostic equipment. By diagnosing a problem correctly and quickly we ensure cost-effective repair at all times.

## REMANUFACTURING

We understand that replacement of pumps and injection are often required quickly and with this in mind we developed our own rapid exchange service by the remanufacturing of diesel fuel injection system. Each part is completely stripped of its components, the worn-out components are scrapped, and new high-quality replacement parts are integrated. All rebuilt/reconditioned parts are tested for quality assurance and backed by our product warranty program.

## OUR PRODUCTS

### Common Rail Direct Injection (C.R.D.I.) System

- In a CRDI system, fuel is stored in a high-pressure common rail, from which it is delivered to each individual cylinder through a solenoid valve injector. This allows for precise control of the fuel injection process and can improve engine efficiency and performance.
- The main advantage of CRDI system is high fuel efficiency and low emissions. Due to complete combustion of fuel.

## ELECTRONIC UNIT INJECTORS & UNIT PUMPS (EUI'S & EUP'S)

Electronic Unit Injector (EUI) is a type of fuel injector used in diesel engines. It uses a combination of electronic and hydraulic technologies to control the fuel injection process. An electronic control unit (ECU) controls the amount of fuel injected by controlling the pressure and timing of the fuel injection. The injectors themselves are activated by high-pressure oil, which is supplied by a gear-driven high-pressure oil pump. An Electronic Unit Injector (EUI) is a type of fuel injector used in diesel engines. It uses a combination of electronic and hydraulic technologies to control the fuel injection process. An electronic control unit (ECU) controls the amount of fuel injected by controlling the pressure and timing of the fuel injection. The injectors themselves are activated by high-pressure oil, which is supplied by a gear-driven high-pressure oil pump. The EUI system allows for precise control of the fuel injection process, which can improve engine efficiency and performance

## Hydraulically Actuated Electronically Controlled Unit Injector

A HEUI system generally consist of a high-pressure oil pump, which generates the necessary oil pressure to activate the injectors, and the injectors themselves, which are controlled by an electronic control module. The high-pressure oil is sent to the injectors through a set of high-pressure oil lines. The injectors are typically located in the engine's cylinder head and spray fuel directly into the combustion chamber.

India Private Limited**

 **Lucas Indian  
Service Limited (Delhi)**

 **Hyundai  
Motor India Limited**

 **Cummins Technologies  
India Private Limited (CCC)**

# AFTERMARKET BRANDS

■ We also deal with many aftermarket reliable brands in the fuel injection world. With these spares and parts, we ensure the quality standards and an alternate options for the repair of diesel fuel injection systems.

# INFRASTRUCTURE

With Advancements In The Sector, Our Workshopis Endowed With Modern Technology And Computerised Machinery For Calibrating And Overhauling Of All Types Of Diesels Fuel Injectors And Pumps By Our Trained And Skiled Technicians.

We Are Equipped With Computerised Test Bench Of Hartridge-uk, Bosch- Germany Robotti & Nova Ditetx-italy ; C-max & One Solution – Turkey And All The Necessary Tools And Equipments- Required For Refurbishment And Remanufacturing of C.r.d.i. Systems, Eui & Heui Injectors And Pumps- As Per The Specificationsby Bosch, Delphi, Lucas, Denso, Siemens, Zexel, Continental, Caterpillar , Cummins, Stanadyne.
